Multi-Depth Boxes

- These cartons offer the benefits of having many box sizes in your inventory without using up valuable storage space.
- Multi-depth style cartons are scored at intervals on the sides of the box.

Corrugated mailers are strong and light-weight to save on postage.

- Great for shipping small, light-weight fragile items.
- Corrugated mailers are manufactured from 200#/ECT-32-B white corrugated.
- Crush resistant mailers fold to provide double walls of protection on front and sides. No tape, glue or staples needed.

PAPERplus® Papillon system offers optimal protection for small and medium-sized shipping goods. It's suitable for filling voids and wrapping products, boasts large volume at a low weight and is especially soft and flexible. Available in a variety of models, the PAPERplus® Papillon machine is simple to adapt to the specific needs of our customers. Three operating modes also simplify on-demand production of paper cushioning directly at the packing station, while the system itself features a compact, space-saving design. When connected with a conveying system and a silo, a single PAPERplus® Papillon can supply multiple packing stations with cushioning at the same time. Call for on-hands demo.
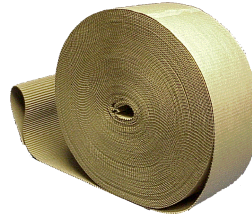

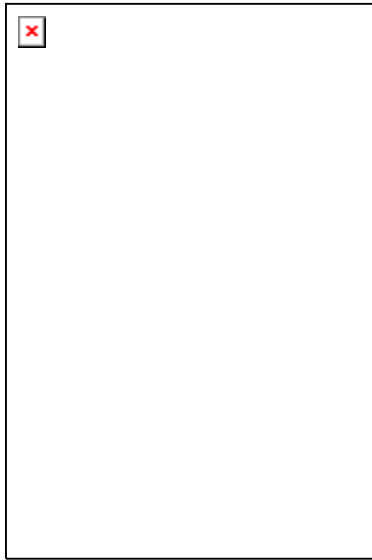

Single Face Corrugated Rolls

Single face corrugated is mostly used as inner packaging to separate and protect individual products inside the outer packaging.

- Highly flexible and can be shaped around products to cushion and protect them from damage.
- Can be used for protecting small, large or irregular shaped products.

Chevron Pad   Papillon Pad

PAPERplus® Chevron

Delivers maximum fill with less material. The unique paper cushion system produces crinkled paper tubes that are large in volume and offer exceptional shock absorption. Very little paper is required to fill void in the package, and will block and brace light to medium-weight shipping goods in the carton. The high-quality paper cushioning is flexible, malleable and, thanks to perforation, very easy to separate manually. PAPERplus® Chevron is available in a variety of versions, including free-standing and multiple tabletop models, and can be easily integrated into existing packing processes. Available in brown and white kraft paper. Call for on-hands demo.

Cornerboard

- Helps prevent damage during shipping and warehousing.
- Used to stabilize loads and improve stacking strength when shipping.
- Stabilizes strapped or stretch-wrapped loads.
- Also available in 0.160 and 0.225 gauge.

AIRplus® TRANSFORMS AIR INTO THE OPTIMAL PROTECTIVE PACKAGING

AIRplus® air pillows are the optimal protective packaging for sensitive products. A variety of pillow shapes can be produced as required directly at the packing station, therefore saving valuable storage space. All AIRplus® machine types can be integrated into existing packing processes including in combination with automated packing lines and storage containers at the packing station.

The range includes four different film types: Prepackaged products can be ideally blocked and braced in the carton with AIRplus® Void, as the large air pillows optimally fill the void. Smaller and medium-sized AIRplus® Cushion and AIRplus® Bubble air pillows are exceptionally flexible, and can be used to cushion, block, and brace or wrap sensitive products. Thanks to its innovative, diamond-shaped structure, AIRplus® Wrap is the ideal substitute for traditional bubble wrapping. Delicate products can be wrapped tightly with these air pillows and are thereby optimally protected. Tailored solutions are important to customers, which is why Storopack offers two different film varieties: the coextruded AIRplus® CX film and the antistatic AIRplus® ESD film for protecting electronic components. Call for on-hands demo.

AIRplus® Mini   AIRplus® Excel   AIRplus® GTI

POLYAIR Master Bubble Rolls

- Superior Burst Strength - Bubble withstands pressure and abuse while providing maximum product protection.
- Excellent Air Retention - Bubble stays inflated to provide continued protection.

White Self-Seal Flat Mailers

Strong chipboard mailers protect photos and documents during shipping.
- Peel and seal closure keeps contents secure during shipment.
- Pull tab strip for easy opening.
- No additional stiffeners needed.
- Made from 100% recycled paperboard.

White Tab-Lock Flat Mailers

Strong chipboard mailers protect photos and documents during shipping.
- Economical locking tab closure.
- Rigid construction will not bend.
- No additional stiffeners needed.
- Practical alternative to bubble packs or shredded paper padded mailers.

Packing List Envelopes

Pressure sensitive envelopes are the industry standard for quality performance.
- Specially formulated hot melt adhesive insures instant bonding to boxes, cases, tubes and other containers.
- Back loader style keeps documents secure in transit because they cannot be removed without destroying the envelope.

FOAMplus® offers the protection required for your product.

Made from expanded polyure-thane, the high-quality packaging foam is resistant, robust and thanks to it being light weight, reduces transport costs.

With the FOAMplus Bag Packer² and Hand Packer foam dispensing systems, protective foam packaging can be produced directly at the packing station and placed into the carton. As the foam expands it molds to the contours of the product and en-capsulates it in a highly versatile packaging medium.

The FOAMplus® Bag Packer²

system produces foam packaging bags at the touch of a button, which adapt specifically to the contours of the packaged goods. Thanks to the proven foam-in-bag system, film bags can be filled with foam automatically through regular batch production or individually, directly at the packing station.
Call for on-hands demo.

FOAMplus® Hand Packer is the

ideal solution for special challenges, including those posed by bulky and heavy packaged goods as well as products with complex contours. The handy foam gun allows you to accurately fill the carton with foam packaging in mere seconds for customized blocking and bracing and the perfect transport of packaged goods.
Call for on-hands demo.

Foam Pouches

Non-abrasive, polyethylene air foam cut and sealed to form a convenient light-weight bag.

- Made from 1/8" polyethylene foam.
- Great for small parts protection.

Packing Peanuts

Loose Fill offers safe, simple, and flexible protection for your goods, regardless of how big or heavy they are. That's because the pourable packing material is made from expanded polystyrene (EPS, also styrofoam), which fills all the void and reliably protects products – even when exposed to heavy strain.

Paper Tape

Use paper tapes to seal light-weight or standard sized packages or cartons that will be shipped in unitized loads or full pallets.

Paper Tape Reinforced

Reinforced water-activated tapes are designed to provide consistent performance in carton sealing applications where durability, extra strength and reliability are required. Extra strong fiberglass yarns are bonded between the high tensile strength sheets for an extra margin of strength.

#140 Grade Paper Gum Tape
Light Duty Paper Tape

Additional Masking Tapes

CP 020 UV-resistant, medium adhesion 8-Day ShurRELEASE® painter's tape.

CP 028 Professional grade, low adhesion 30-Day ShurRELEASE® painter's tape for delicate surfaces.

CP 060 Premium grade, low adhesion 60-Day ShurRELEASE® RazorEdge® painter's tape for delicate surfaces.

Filament Tape

Polypropylene film with economical fiberglass reinforcements and a 'solventless' pressure-sensitive synthetic rubber/resin adhesive. Provides excellent adhesion to corrugated cartons and outstanding holding power. High impact resistance for packaging and holding.

Water Activated Tape Dispensers

TDH
Marsh TD2100 manual tape dispenser for gummed paper tape. 12 gauge, all metal uni-body construction, powder-coat painted with industrial gray finish. Built-in, all metal adjustable tape guides maintains tape roll for smooth tape flow and accurate cutting and less jamming.

TDE110
The state-of the-art, electronically driven, TD2100 electric tape dispenser was designed with ease of operation and dependability in mind. All models feature a tactile keypad with repeat keys for short and long tape lengths. Ideal for sealing same size cartons! Random/Continuous feature built in, LCD display of programmed lengths.

B333
Manual water-activated tape dispenser that is rugged, reliable and simple to use. This dispenser is perfect for light-to medium-volume packaging areas and accommodates both reinforced or non-reinforced water-activated tapes.

B555E
This machine is created for fast-paced packaging environments where increased productivity, efficiency and carton sealing output is needed.

Shrink Film

Polyolefin SYTEC 307S film is recommended for packaging applications where maximum optics and durable wrapping are required. Strong seals and excellent shrink appearance are obtained with ease. This film is especially suitable for use on medium and high speed packaging systems. This film runs well on high speed form fill and seal machines equipped with a static seal system.

Polyolefin SYTEC® 701 film is a new polyolefin shrink film for a wide range of packaging applications. The innovative crosslink process provides strong, durable seals and excellent shrinkage. Optical properties are superior. This film exhibits outstanding abuse resistance and is easy to use. 701 is designed to seal on "L" bar sealers along with high speed side seal equipment.

Pallet Wrap (Hand Films)

Blown Stretch Film typical characteristics are: poor optics, hazy, dull, excellent puncture resistance, very noisy unwind and high force on load.

SUPREME is a premium grade film made with special orientation for a stronger film at thinner gauges.

1000B Semi-Auto   2000B Semi-Auto   2000F Fully Auto

Polypropylene Strapping is the most economical, lightweight and well suited for most light to medium weight bundling and light palletizing applications. This product offers higher elongation, but tends to have irrecoverable dead stretch with constant stress.

Polyester Strapping is the strongest plastic strapping product and is used as a viable alternative to steel strapping. Polyester provides excellent retained tension on rigid loads. Its excellent recovery properties help a load absorb impact without strap breakage.

For Use In Fully-Automatic Strapping Machines

Poly Tubing

Poly tubing is excellent for creating protective packaging for items of varying length because the tubing can be cut to the lengths required and sealed on one or both ends.
Available in 1.5,2,3,4 and 6-mil
Call for more information.

Pallet Covers

- Covers protect large items from dirt and dust.
- Bags are pre-cut and perforated on a roll for easy use.
- Call for available sizes.

Top Sheet Covers

Provide added protection for shrink wrapped pallets. They help protect contents from water and dust as well as helping to ensure the integrity of the pallet contents. Call for available sizes.

Bin Liners

Provide an excellent means to retain bin contents and protect them from dust, dirt and moisture. They are made from sturdy Low Density Polyethylene material and can stand up to the toughest tasks. Call for available sizes.

Main Line Packaging Equipment

The Eagle SP11 offers eco-friendly operation through use of two direct-drive 24VDC motors. This eliminates the need for a complex belt and pulley system and provides for nearly silent operation. Strap tension is controlled electrically, which eliminates the need for a manual spring-based hand crank system.

The Eagle 800 is an enhanced automatic strapping machine for wide straps (9mm – 12mm). With its enhanced features, the Eagle 800 has the best price to performance ratio of products in its class.

The Eagle 710 is an innovative world-class high-speed automatic strapping machine capable of using 5mm, 6mm, 9mm or 12mm polypropylene strap. It offers optimal performance, highest speed, easiest maintenance and the most cost effective solution in its class.

T100 Uniform Case Sealer
- Side drive belts
- Locking casters
- Top squeezers
- Dual mast
- Top and bottom tape heads
- Extension roller tables

T210-SS Uniform Case Sealer
- Stainless steel construction
- Top and bottom drive belts
- Locking casters
- Top squeezers
- Dual mast
- Top and bottom tape heads
- Extension roller tables
- Ideal for wide cartons

T550RL Random Case Sealer
- Stainless steel construction
- Top and bottom drive belts
- Locking casters
- Top squeezers
- Dual mast
- Top and bottom tape heads
- Extension roller tables
- Ideal for wide cartons

Eagle 1000B
- Semi-Automatic or Manual Operation
- Simplified control panel for easy operation
- Automatic Load-Height Sensor (ALHS)
- Powered Pre-Stretch (250%)

Eagle 2000B
- Semi-automatic or manual operation
- Powered pre-stretch (250%)
- PLC (Programmable Logic Controller)
- LCD display with integrated controls

Eagle 2000F
- Fully automatic operation
- Powered pre-stretch (250%)
- PLC (Programmable Logic Controller)
- LCD display with integrated controls
- ALHS (Automatic Load-Height Sensor)

Packaging Equipment Preventive Maintenance Program

Most preventive maintenance packages are done on a quarterly schedule. Unless you have equipment as previously discussed that needs daily or frequent service, having your equipment maintained every three months will ensure that most small issues are caught and resolved before they turn into larger issues.

Following a preventive maintenance schedule will ensure your packaging equipment is properly maintained. This will reduce downtime and costly repairs.

Preventive maintenance will include inspecting, cleaning, lubricating, tightening and replacing all or any parts as necessary. Your service technician will inspect belts for proper tension, replace and change oil as needed, clean, lubricate and align or replace sprockets, belts and shafts.

For more information or to setup a service call, please contact your Sales Representative.

In-House Sales & Service but not limited to the following manufactures.
